**clinell® - the professionals' choice for infection control...**

### **Universal Wipes**

The most effective universal formula in the market today. Kills at least 99.9% of germs - and effective in 10 seconds. The number one choice in infection control for the NHS and extensively used in hospitals, GP clinics, nursing and residential homes, dentists, vets, laboratories and pharmaceutical outlets.

### **Bed Bathing Range**

Replaces traditional methods of bed bathing for greater effectiveness. **clinell®** Bedbath Wipes are a simple, rinse-free bathing solution, designed to clean and

moisturise all areas of the body - in one easy step. The wipes are dermatologically tested - and alcohol and lanolin free.

### **Continence Care Wipes**

A new and effective approach to the safe, quick and easy clean up of body fluids. This proven range consists of an impressive variety of wet wipes and disinfectant sprays for use on surfaces, skin, medical devices and body fluid spills. Dermatologically tested, alcohol and lanolin-free.

### **Sporicidal Wipes**

The most powerful wipes in the world. Highly effective in targeting Clostridium Difficile. The wipes produce peracetic acid as the active ingredient, which will kill all germ groups, thus providing a direct and safe alternative to chlorine products.

## A3 SAMPLE PACK LEAFLET - PAGE 2

### **The clinell® range**

#### **Universal Wipes**

**clinell®** Universal Wipes kill at least 99.9% of germs – and are effective in 10 seconds. **They are the number one choice in infection control for the NHS** - and provide a single product to clean and disinfect hands, surfaces and equipment. They contain a revolutionary patented formula containing 6 different biocides.

#### **Sporicidal Wipes**

**clinell®** Sporicidal Wipes are the most powerful wipes in the world - and are used specifically to target *Clostridium difficile*. The wipes, once water is added, produce peracetic acid, which kills all germ groups, thus providing a direct and safe alternative to chlorine products.

### **Continence Care Wipes**

**clinell**® Continence Care Wipes replace traditional methods associated with continence care. They provide a unique 7-in-1 action of cleansing, moisturising, anti-bacterial, antipruritic, barrier protection, deodorising and soothing - and are designed to be very gentle on sensitive skin.

### **Bed Bathing Range**

**clinell**® Bedbath Wipes are a simple, rinse-free bathing solution, designed to clean and moisturise all areas of the body. They conveniently replace the more traditional methods of bed bathing, making them cost effective by reducing laundry bills and nursing time. They are dermatologically tested, alcohol and lanolin free.
