Dear Mr Sample

**Save up to 40% on your energy costs - and make your bank  
much more attractive for your customers and your employees**

Is your bank GREEN enough - or could it be more energy efficient?

In his new 2015 Dubai Strategic Plan, **His Highness Sheikh Mohammed bin Rashid Al Maktoum**, is encouraging business owners in Dubai to become more energy efficient and to embrace the new GREEN building principles.

It's a wonderful initiative and one that has quickly been adopted throughout the Gulf region. The reason is simple. We all need to be part of conserving the planet's resources.

And, when we can do that - and save money at the same time - it's a win-win situation.

By fitting solar film on your windows, you not only make your bank certifiably GREEN, but **you also save up to 40% on your energy costs**, whilst also protecting your customers and your valuable workforce at the same time.

Panzerfilm from Orpro offers superb protection against the heat. It **reduces the sun's heat by up to 46%**. This means your building and workplace not only become more comfortable for everyone inside, they are actually **cheaper to run** because your air conditioning costs are significantly reduced.

It also reduces interior fading and damage caused by the sun's extremely harmful and very dangerous UV rays.

Orpro is a world leader in glass film installation and has recently completed high profile projects in the UAE for many blue chip clients, including - *Burj Al Arab, Emirates Towers, Jumeirah Hotel, HP, Shell and Grand Hyatt.*

To find out more about how Panzerfilm can benefit your company and to arrange your **FREE No Obligation Energy Savings Analysis**, please visit our website at <http://www.panzerfilm.com/> and request an appointment.

You can also call us on **+9714 6526 3880**, or email us directly at [felicia@orpro.net](mailto:felicia@orpro.net)

We look forward to hearing from you very soon.
